## **Instruction for Preparation of Case for Support - Industry Secondment Program**

Please indicate the main activities to be undertaken and the expected outcomes from the secondment. Do not exceed two pages.

1. Details of collaborative research

Provide a detailed description of the collaborative research to be undertaken during the secondment including how novel, realistic/ambitious the research project is. Outline the specific anticipated deliverables and appropriate milestones by which to measure progress.

2. Work pattern during the secondment

Provide details of the format of the secondment including: anticipated full time or part time working pattern, any travel and accommodation arrangements, and how you propose to balance your university and industry commitments.

3. Choice of the host industry sponsor

Provide justification for the choice of industry sponsor including the strategic importance of this relationship to you and your institution. Outline what would be the expected benefits for the company through this appointment. Provide details of what has been achieved so far through any existing collaboration and what is the overall perceived long term vision for this relationship.

4. Enhancement of teaching and student learning

Outline your plans to utilize your industrial experience to enhance both your teaching and student learning upon your return from secondment. E.g., how you propose to enrich your teaching activities (e.g. undergraduate/postgraduate teaching curriculum development, supervision of project students, etc), the envisaged impact upon student learning and how it will enhance the employability of your students.
